EDUCATION

B.Tech in Information Technology, Ajay Kumar Garg Engineering College, Ghaziabad June 2026

- Team Lead, Smart India Hackathon (SIH) 2024: Led a team shortlisted from 302+ internal teams; securing a Top-5 institute rank during the internal selection round.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript, Java, Python
Web Development: Node.js, Express.js, React.js
Design Tools: Figma, Canva
Version Control: Git, GitHub

Databases: MongoDB, PostgreSQL
AI & DevOps: Gemini & OpenAI API, Docker
Auth & Payments: OAuth, JWTs, Razorpay
Other Concepts: Agile workflows, Deployments

PROFESSIONAL EXPERIENCE

OrangeCat Technologies - Software Development Intern

August 2025 - Present

- Built and maintained frontend features and company website; collaborated with founder and backend team; internship extended 3x for performance.
- Improved deployment and code reuse through modular **React + TypeScript** components and industry-friendly structure.
- **Cortex - AI-Powered Data Analyst Agent:**
 - Engineered frontend architecture for a streaming AI agent; designed CSV → DB UI flows (attach/detach/query) and integrated with **FastAPI REST APIs**, improving task sync reliability.
 - Tech: **React, TypeScript, FastAPI, Plotly**.
- **SyntX - Main Website Revamp:**
 - Redesigned (retro themed) and rebuilt the developer platform frontend with custom SVG UI from Figma; implemented **OAuth** (Google & GitHub) and reusable component library to speed feature delivery.
 - Tech: **React, Tailwind, OAuth**.
 - Live: <https://syntx.dev>

NexisLabs Solutions - Web Development Intern

June 2025 - August 2025

- Worked as a Web Developer, collaborating with design and backend teams to deliver features for client-facing applications.
- Built responsive UI components, integrated APIs, resolved issues, and participated in requirement discussions with clients.
- **HrGenie - AI-Powered Recruitment Platform:**
 - Designed the entire **Figma** interface directly with the client, defining UX flow, information architecture, and UI consistency.
 - Contributed to backend by implementing **Node.js + Express APIs** for candidate data and admin workflows.
 - Improved performance, responsiveness, and cross-page navigation, ensuring smooth user experience.
 - Tech: **React, TypeScript, Express**.

PROJECTS

CourseHub: Full-stack MERN learning platform

July 2025 - Present

- Built a full-stack MERN LMS used by **30+ testers**, with fast course browsing, smooth enrollment flows, and clean role-based UX for students & instructors.
- Implemented Auth0 OAuth + JWT access control, reducing login issues and cutting onboarding steps by ~30%.
- Integrated a Gemini-powered contextual chatbot, enabling course-specific doubt resolution and improving user query clarity by ~30% during testing.
- Added secure Razorpay payments and tested **20+ checkout flows** with <1% failure rate in Razorpay sandbox mode; containerized backend with Docker for consistent dev environments.
